Broadcasting the Word

Reginald Aubrey Fessenden was a Canadian-American physicist, engineer and inventor with 300 patents. He is credited with broadcasting the first program of voice and music. He invented the "continuous wave" AM radio: sound superimposed by amplitude modulation onto a carrier radio wave for transmission. But "carrying" the transmission of the sound was only one piece of the process. A radio "receiver" would be necessary to extract the signal from the carrier wave so the listener could hear the original sound. Fessenden made the first long-range transmissions of voice on Christmas Eve 1906 from a station at Brant Rock, Massachusetts, heard hundreds of miles out in the Atlantic.

God sent His Son into the world over 2000 years ago. He was the living transmission of the very mind, heart and voice of God. But billions upon billions of people have lived and died since then without hearing the physical voice of Christ.

It has since been left to us, His disciples, to serve as His radio receivers, extracting truth from the Word of God and broadcasting it to those who have not yet heard, so that they, too, might hear His voice.

Matthew 28:18-20

"And Jesus came and said to them, "All authority in heaven and on earth has been given to me. Go therefore and make disciples of all nations, baptizing them in the name of the Father and of the Son and of the Holy Spirit, teaching them to observe all that I have commanded you. And behold, I am with you always, to the end of the age".

I love you all,
Tim
