## **Perfect Numbers Always Add Up**

As our kids get ready to go back to school, I thought it would be a great time to remind them of some of the math that they have most likely learned in the past. I just know how excited they all are to get back to school, so here you go.

If the sum of all the divisors of a number is equal to the number itself, it is called a "perfect" number. Divisors are those numbers that "go into" another number. An example is the number 6: Its divisors are 1, 2, and 3 which, when added together equal 6.

Why would I do that to you? Well, it is because I want us all to remember that all kinds of things "go into" our lives. Some are good. Some are not so good. Some are downright terrible. Nevertheless, they are all necessary for you to experience the life that God intends for you.

### ***Romans 8:28***

***And we know that in all things God works for the good of those who love him, who have been called according to his purpose.***

I love you all,

Tim
