## Finding a Fixed Point

On day six of the ill-fated mission of Apollo 13, the astronauts needed to make a critical course correction. If they failed, they might never return to Earth.

To conserve power, they shut down the onboard computer that steered the craft. Yet the astronauts needed to conduct a thirty-nine-second burn of the main engines. With no computer to guide them, they needed to come up with a way to stay on course during the burn. Astronaut Jim Lovell determined that if they could keep a fixed point in space in view through their tiny window, they could steer the craft manually. That focal point turned out to be their destination--Earth.

As shown in 1995's hit movie, *Apollo 13*, for thirty-nine agonizing seconds, Lovell focused on keeping the earth in view. By not losing sight of that reference point, the three astronauts avoided disaster.

Scripture reminds us that to finish our life mission successfully, we must **fix our eyes on Jesus, the author and perfecter of our faith (Hebrews 12:2)**. He is our point of reference, our focal point if we hope to fulfill our mission.

I love you all,

Tim
